

Q and A-s for SOL No. 525-09-003

This Q&A sheet will be up-dated periodically and potential offerors are encouraged to check this page again prior to submission.

Please let me know what information you would like me to include beyond my proposed fee.

In addition to the information requested in the solicitation, proposers are welcome to provide whatever additional information they feel will be helpful in making a selection. We encourage proposers to respond as closely as possible to the requirements listed for the position.

Could you give me an indication of the flexibility on time for the position?

Given USAID's desire to ensure the most qualified individuals are available for this work, and given the complexity of scheduling three independent contractors, we will work with selected candidates to optimally schedule this work. While the ultimate decision will be made for programmatic reasons, we encourage interested candidates not to self de-select due to scheduling concerns.

If I participate as a member of the design team am I excluded from consideration for subsequent contracts?

While you are not categorically excluded from consideration, the likelihood exists that you would not be eligible due to your exposure to procurement sensitive information that cannot be made available to all potential bidders on subsequent procurements. Therefore, potential respondents to this Solicitation Request are strongly encouraged to consider this fact and decide what phase of the project (design, implementation, evaluation, etc.) is of most interest to them and request consideration accordingly.

What kind of supervision will I receive?

You will be working under the direction of a team leader, hired short-term, who is responsible for submission of the final product.
